Subject: Evaluation License agreement for Fire Ant Technology

Dear Trevor,

Thank you for executing an evaluation license agreement, UCF reference number 2025-0047. As per the terms, you are now licensed to evaluate the technologies described in United States Patent number 10,716,302, entitled *Environmentally Safe Insect Control System.* With the help of Dr. Joshua King of UCF and the expertise and know-how of UCF he provides, we hope you are successful in treating the issues of fire ant control in Queensland. Once ready to do so on your end, we should be able to negotiate a broader license agreement for use of the technology.

Should you have questions or concerns, please feel free to reach out to me directly. Thank you very much and have a great day.

Sincerely,

Benjy Neymotin, PhD
Assistant Director, Office of Technology Transfer
